Projeto

O código

```
1 import React, { useState } from 'react';
2 import { View, Text, Button, Alert } from 'react-native';
3
4 import ChoicePicker from '../components/ChoicePicker';
5 import CoinDisplay from '../components/CoinDisplay';
6 import StatsCard from '../components/StatsCard';
7 import styles from '../styles/FlipCoinStyles';
8
9 type CoinSide = 'cara' | 'coroa';
10
11 export default function FlipperScreen() {
12   const [selectedChoice, setSelectedChoice] = useState<CoinSide>('cara');
13   const [result, setResult] = useState<CoinSide | null>(null);
14   const [isFlipping, setIsFlipping] = useState(false);
15
16   const [totalRounds, setTotalRounds] = useState<number>(0);
17   const [userWins, setUserWins] = useState<number>(0);
18   const [appWins, setAppWins] = useState<number>(0);
19
20   const handleFlipCoin = () => {
21     if (isFlipping) return;
22     setIsFlipping(true);
23
24     const drawnResult: CoinSide = Math.random() < 0.5 ? 'cara' : 'coroa';
25
26     setTimeout(() => {
27       setResult(drawnResult);
28       setTotalRounds((prev) => prev + 1);
29
30       if (drawnResult === selectedChoice) {
31         setUserWins((prev) => prev + 1);
32         Alert.alert('Resultado', 'Deu ${drawnResult.toUpperCase()}! Você venceu.');
```
